Pure substance/mixture

Unique Formula Identifier (UFI)

9MD1-F0A5-F00C-307U

Mixture

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses

To form a protective and decorative layer for GRP composites. Contact us before using for food contact application.

1.3. Details of the supplier of the safety data sheet

Supplier

Polynt Composites France S.A.

Route d'Arras CS 50019 62320 Drocourt, France Tel: (+33) 3 21 74 84 00 - Fax: (+33) 3 21 49 55 84

Via Enrico Fermi, 51 24020 Scanzorosciate (BG), Italy Tel: (+39) 035 652 111 - Fax: (+39) 035 652 421

Polynt Composites Spain, S.L.U.

Avenida República Argentina S/N 09200 Miranda de Ebro - Burgos, Spain

Tel: (+34) 947 027 202 - Fax: (+34) 947 31 45 40

Polynt Composites Poland Sp. z o.o.

ul. Grabska 11d, 32-005 Niepołomice, Poland Tel: (+48) 12 281 42 00 - Fax: (+48) 12 281 42 01

Polynt Composites Norway AS

Lilleborggata 4, 1630 Gamle Fredrikstad, Norway Tel: (+47) 693 570 00 - Fax: (+47) 693 570 01

Polynt Composites Stallingborough UK Ltd.

Laporte Road, Stallingborough - Near Grimsby North East Lincolnshire DN41 8DR,

United Kingdom

Tel: (+44) 1469 552 570 - Fax: (+44) 1469 552 597

Polynt Composites Route d'Arras - CS 50019 - 62320 Drocourt - France Version: CLUK

Page 2/24

Former date 22-Sep-2022 Revision date 29-Dec-2022 Version: 3

The supplier of the product is, among those indicated above, the one identified on the label and / or in the sales documents

For further information, please contact

E-mail address sdsregulatory@polynt.com Internet Address http://www.polynt.com

1.4. Emergency telephone number

This telephone number is available 24 hours per day, 7 days per week.				
Europe :		+44 1235 239 670		
Middle East/Africa:		+44 1235 239 671		
East/South East Asia:		+65 3158 1412		
America :		+1 215 207 0061		

Poison Information Centre telephone number

European emergency phone number: 112

UK: National Poisons Emergency Number: 0344 892 0111

Ireland: National Poisons Information Centre (NPIC) Telephone Healthcare

Professionals: +353 (01) 809 2566. (24 hour service) Telephone Members of Public:

+353 (01) 809 2166. (8.00 a.m. to 10.00 p.m. 7 days a week)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification of the substance or mixture - GHS/CLP (n° 1272/2008)

Skin Corrosion/Irritation	Category 2 - (H315)
Serious Eye Damage/Eye Irritation	Category 2 - (H319)
Skin Sensitization	Category 1 - (H317)
Reproductive Toxicity	Category 2 - (H361d)
Specific Target Organ Toxicity (Single Exposure)	Category 3 - (H335)
Specific target organ toxicity - repeated exposure	Category 1 - (H372)
Chronic Aquatic Toxicity	Category 3 - (H412)
Flammable liquids	Category 3 - (H226)

2.2. Label elements

Contains cobalt octoate, Styrene

Signal word

Danger

Hazard statements H315 - Causes skin irritation

H317 - May cause an allergic skin reaction H319 - Causes serious eye irritation H335 - May cause respiratory irritation

H361d - Suspected of damaging the unborn child

H372 - Causes damage to organs through prolonged or repeated exposure if inhaled

H412 - Harmful to aquatic life with long lasting effects

Physical hazards H226 - Flammable liquid and vapour

Polynt Composites Route d'Arras - CS 50019 - 62320 Drocourt - France Version: CLUK

POLYCOR ISO BR

Page 3/24

Revision date 29-Dec-2022 Former date 22-Sep-2022 Version: 3

Precautionary statements

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking

P243 - Take action to prevent static discharges

P260 - Do not breathe vapour

P273 - Avoid release to the environment

P280 - Wear protective gloves/protective clothing/eye protection/face protection

P302 + P352 - IF ON SKIN: Wash with plenty of soap and water

P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for

breathing

P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing

P403 + P233 - Store in a well-ventilated place. Keep container tightly closed

2.3. Other hazards

PBT/vPvB see section 12.5.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Hazardous components

POLYCOR ISO BR

Page 4/24

Former date 22-Sep-2022 Revision date 29-Dec-2022 Version: 3

SECTION 4: First aid measures

4.1. Description of first aid measures

General advice Show this safety data sheet to the doctor in attendance

Do not breathe dust/fume/gas/mist/vapours/spray

Eye Contact Rinse thoroughly with plenty of water, also under the eyelids.

Keep eye wide open while rinsing. If symptoms persist, call a physician

Wash off immediately with soap and plenty of water removing all contaminated clothes Skin contact

and shoes

If skin irritation persists, call a physician

Inhalation Move to fresh air

If not breathing, give artificial respiration

Consult a physician

Do NOT induce vomiting Ingestion

Rinse mouth. Consult a physician

Protection of first-aiders Use personal protective equipment

See section 8 for more information

4.2. Most important symptoms and effects, both acute and delayed

Irritating to eyes **Eye Contact**

Skin contact Irritating to skin

May cause sensitisation by skin contact

Inhalation Harmful: danger of serious damage to health by prolonged exposure through inhalation

Irritating to respiratory system

Ingestion Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhoea.

4.3. Indication of any immediate medical attention and special treatment needed

Notes to physician No information available

SECTION 5: Firefighting measures

5.1. Extinguishing media

Dry chemical, Foam, Carbon dioxide (CO₂), (closed systems) Suitable extinguishing media

Extinguishing Media Which Must not be Used for Safety Reasons

Do not use a solid water stream as it may scatter and spread fire.

5.2. Special hazards arising from the substance or mixture

Special exposure hazards arising itself, combustion products,

resulting gases

Vapours may form explosive mixtures with air. Most vapours are heavier than air. They from the substance or preparation will spread along ground and collect in low or confined areas (sewers, basements, tanks)

Heating or fire can release toxic gas: Carbon monoxide

5.3. Advice for firefighters

Polynt Composites Route d'Arras - CS 50019 - 62320 Drocourt - France Version: CLUK

POLYCOR ISO BR

Page 5/24

Former date 22-Sep-2022 Revision date 29-Dec-2022 Version: 3

Special protective equipment for

fire-fighters

Wear self-contained breathing apparatus and protective suit.

Other information Cool containers / tanks with water spray.

Fire residues and contaminated fire extinguishing water must be disposed of in

accordance with local regulations.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Personal precautions

Remove all sources of ignition Heat, flames and sparks.

Take precautionary measures against static charges.

Ensure adequate ventilation
Use personal protective equipment

For emergency responders

Avoid breathing vapours or mists In the event of fire and/or explosion do not breathe

fumes. Use personal protective equipment

6.2. Environmental precautions

Environmental precautionsThe product should not be allowed to enter drains, water courses or the soil.

Do not flush into surface water or sanitary sewer system

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand,

earth, diatomaceous earth, vermiculite) and place in container for disposal according to

local / national regulations (see section 13)

Use clean non-sparking tools to collect absorbed material

6.4. Reference to other sections

See section 8 for more information

See Section 12 for additional Ecological Information

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Precautions for safe handlingAvoid static electricity build up with connection to earth

Use only in area provided with appropriate exhaust ventilation

In case of insufficient ventilation, wear suitable respiratory equipment

For personal protection see section 8

Prevention of fire and explosion Keep away from open flames, hot surfaces and sources of ignition Empty containers

may contain flammable or explosive vapours

Hygiene measures When using, do not eat, drink or smoke Wash hands before breaks and at the end of

workday. Provide regular cleaning of equipment, work area and clothing

7.2. Conditions for safe storage, including any incompatibilities

Technical measures/Storage

conditions

Keep in a dry, cool and well-ventilated place. Keep at temperature not exceeding 30°C

Keep away from heat and sources of ignition.

Materials to avoid Strong oxidizing agents, Catalyst, Peroxides, Reducing agents

Polynt Composites Route d'Arras - CS 50019 - 62320 Drocourt - France Version: CLUK

POLYCOR ISO BR

8.2. Exposure controls

Occupational exposure controls **Engineering measures**

Apply technical measures to comply with the occupational exposure limits.

When working in confined spaces (tanks, containers, etc.), ensure that there is a supply of air suitable for breathing and wear the recommended equipment

Personal protective equipment

General Information Respiratory protection

Use personal protective equipment.

Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour) If exposure limits are likely to be exceeded / In case of insufficient ventilation wear suitable respiratory equipment:

Breathing apparatus with filter Type A (Organic gases and vapours filter conforming to EN 14387, APF 40 < 1 hour, APF 200 > 1 hour) / Type A(2)/P3 in combination with Particulates filter conforming to EN 143, if exposed to dust

Route d'Arras - CS 50019 - 62320 Drocourt - France Polynt Composites

POLYCOR ISO BR

Page 9/24

Revision date 29-Dec-2022 Former date 22-Sep-2022 Version: 3

Eye protection

Skin and body protection **Hand protection**

Safety glasses with side-shields. Do not wear contact lenses.

Antistatic boots. Protective shoes or boots. Wear fire/flame resistant/retardant clothing. Wear chemically resistant gloves (tested to EN 374) in combination with 'basic'

employee training

Glove material: Neoprene, Nitriles, Viton (R) or Polyvinyl alcohol

Gloves should be discarded and replaced if there is any indication of degradation or

chemical breakthrough.

Environmental exposure controls

Environmental exposure controls Do not allow material to contaminate ground water system.

No data available Flammable solids No data available **Pyrophoric liquids** Pyrophoric solids No data available Self-heating substances and No data available

Substances and mixtures which, in contact with water, emit flammable

gases

No data available Oxidising liquids Oxidising solids No data available No data available **Oxidising Properties** Organic peroxides No data available Corrosive to metals No data available No data available **Desensitised explosives**

Other safety characteristics

Sensitivity to Mechanical Impact No data available SAPT (self-accelerating No data available

polymerisation temperature)

Formation of explosible dust/air

mixtures

No data available Acid/alkaline reserve **Miscible** No data available Conductivity No data available Corrosiveness No data available No data available Gas group **Redox potential** No data available Photocatalytic properties No data available

SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity Product may ignite and burn at temperatures exceeding the flash point

10.2. Chemical stability

Stability Stable under recommended storage conditions.

10.3. Possibility of hazardous reactions

Hazardous reactions In use, may form flammable/explosive vapour-air mixture.

Hazardous polymerisation

10.4. Conditions to avoid

Polymerisation can occur.

Conditions to avoid Heat, flames and sparks. Exposure to light.

Take precautionary measures against static charges.

10.5. Incompatible materials

Materials to avoid Strong oxidizing agents, Catalyst, Peroxides, Reducing agents

10.6. Hazardous decomposition products

Incomplete combustion and thermolysis produces potentially toxic gases such as carbon Hazardous decomposition

monoxide and carbon dioxide products

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

Inhalation Harmful: danger of serious damage to health by prolonged exposure through inhalation

Irritating to respiratory system

12.6 Endocrine disrupting properties

Endocrine disrupting properties No information available

12.7 Other Adverse Effects

None known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Waste from Residues/Unused Products

Dispose of in accordance with the European Directives on waste and hazardous waste. Do not flush into surface water or sanitary sewer system

, ,

Contaminated packaging Empty containers should be taken to an approved waste handling site for recycling or

disposal.

Other information According to the European Waste Catalogue, Waste Codes are not product specific, but

application specific.

Waste codes should be assigned by the user based on the application for which the

product was used.

Full text of H-Statements referred to under sections 2 and 3

H226 - Flammable liquid and vapour

H304 - May be fatal if swallowed and enters airways

H315 - Causes skin irritation

H317 - May cause an allergic skin reaction

H319 - Causes serious eye irritation

H332 - Harmful if inhaled

H335 - May cause respiratory irritation

H336 - May cause drowsiness or dizziness

H360Fd - May damage fertility. Suspected of damaging the unborn child

H361d - Suspected of damaging the unborn child

H372 - Causes damage to organs through prolonged or repeated exposure if inhaled

H400 - Very toxic to aquatic life

H411 - Toxic to aquatic life with long lasting effects H412 - Harmful to aquatic life with long lasting effects

EUH066 - Repeated exposure may cause skin dryness or cracking

Training Advice Handle in accordance with good industrial hygiene and safety practice. To avoid risks to

man and the environment, comply with the instructions for use.

Scenario 1: Manufacturing of UP/VE resins and formulated resins (Gelcoat, Coulour Paste, Putty, Bonding paste/Adhesive) (ES1)

This scenario is described by the following combinations of use descriptors. The corresponding contributing scenarios are described in the respective subchapters.

An overall exposure scenario may be described by a number of contributing scenarios which may be subdivided into environmental exposure, worker exposure and consumer exposure.

The following scenarios contribute to the scenario Manufacturing of UP/VE resins and formulated resins (Gelcoat, Coulour Paste, Putty, Bonding paste/Adhesive).

This document has been prepared using REACH-Practical-Guide-on-Safe-Use-Information-for-Mixtures-under-REACH-The-LCID-Methodology, considering exposure scenario of relevant raw materials contained in the mixture.

The corresponding release to the environment, exposure of workers resulting from these contributing scenarios is summarized below.

Table 1. Description of ES 1

Free short title	Manufacturing of UP/VE resins and formulated resins (Gelcoat, Coulour Paste, Putty, Bonding paste/Adhesive) (ES1)
Systematic title based on use descriptor	ERC 2; PROC 1, 3, 4, 5, 8a, 8b, 9, 15
Name of contributing environmental scenario and corresponding ERC	ERC 2 – Formulation into mixture
Name(s) of contributing worker scenarios and corresponding PROCs	PROC 1 - Chemical production in closed process PROC 3 - Use in closed batch process (synthesis or formulation) PROC 4 - Chemical production where opportunity for exposure arises PROC 5 - Mixing or blending in batch processes (multistage and/or significant contact) PROC 8a - Transfer of chemicals from/to vessels/ large containers at non dedicated facilities PROC 8b - Transfer of substance or mixture (charging and discharging) at dedicated facilities PROC 9 - Transfer of substance or mixture into small containers (dedicated filling line, including weighing) PROC 15 - Use of laboratory reagents in small scale laboratories
Contributing Scenario (1) controlling e	nvironmental exposure for ERC 2
Operational conditions (referred to styrene)	
Daily amount used at site	45700 kg/day (referred to styrene)

Release times per year	300 days/year (justification: Continous release)
Local freshwater dilution factor	41
Local marine water dilution factor	100
Release fraction to air from process	0.102 %
Release fraction to wastewater from process	0.00063 %
Release fraction to soil from process	0.0025 %
Fraction tonnage to region	10 %
Fraction used at main source	60 %
STP	yes
River flow rate	18000 m³/day
Municipal sewage treatment plant discharge	2000000 L/day
Other modified EUSES values (referred to styre	ene)
Fraction released to agricultural soil (Femis.agric)	0 % (justification: No direct release to soil (EU Risk Assessment Report on Styrene,European Communities, 2002)
Fraction released to industrial soil (Femis.ind)	0 % (justification: No direct release to soil (EU Risk Assessment Report on Styrene,European Communities, 2002))
Fraction released to waste water (Femis.water)	0.00063 % (justification: EU Risk Assessment Report, 2002)
Fraction released to air (Femis.air)	0.102 % (justification: EU Risk Assessment Report, 2002)
Fraction used at main source	60 % (justification: Value adopted to account for Worst-case European manufacturing site)
Fraction of emission directed to water by local STP (Fstp.water)	0.081 - (justification: Efficiency STP 91.9%)
Contributing Scenario (2) controlling in	ndustrial worker exposure for PROC 1
Name of contributing scenario	1 - Use in closed process, no likelihood of exposure
Scenario subtitle	Use in contained batch processes. Closed processes
Qualitative Risk Assessment	
General	
	Use in semi-automated and predominantly enclosed filling lines. Provide a good standard of general ventilation. Natural ventilation is from windows and doors etc. Controlled ventilation means air is supplied or removed by a powered fan. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374. Use suitable eye protection.
Product characteristics	lines. Provide a good standard of general ventilation. Natural ventilation is from windows and doors etc. Controlled ventilation means air is supplied or removed by a powered fan. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374.
Product characteristics Physical state	lines. Provide a good standard of general ventilation. Natural ventilation is from windows and doors etc. Controlled ventilation means air is supplied or removed by a powered fan. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374.

Europeitry / Dustiness	mo dive
Fugacity / Dustiness	medium
Frequency and duration of use	
Duration of activity	>4 hours (default)
Frequency of use	5 days / week
Human factors not influenced by risk	
Exposed skin surface	240 cm ²
Other given operational conditions aff	ecting workers exposure
Location	indoors
Ventilation	enhanced (>30%)
Domain	industrial
Technical conditions and measures to	control dispersion and exposure
Local exhaust ventilation	no
Conditions and measures related to pe sec.8 of SDS	ersonal protection, hygiene and health evaluation: see details on
Protective gloves	Gloves APF 5 80 %
Respiratory protection	no
Contributing Scenario (3) contr	olling industrial worker exposure for PROC 3
Name of contributing scenario	3 - Use in closed batch process (synthesis or formulation)
Scenario subtitle	Bulk transfers. Receipt and storage of raw materials in bulk or as packed goods, indoor and outdoor; Raw material assembly and charging; dispensing of liquids and solids via pipeline;
Qualitative Risk Assessment	
General	Use in semi-automated and predominantly enclosed filling lines; Use bulk or semi-bulk handling systems. Drain down and flush system prior to equipment break-in or maintenance. Provide extract ventilation to points where emissions occur. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374. Use suitable eye protection.
Product characteristics	
Physical state	liquid

Exposed skin surface	240 cm ²
Other given operational conditions affect	ing workers exposure
Location	indoors
Ventilation	good (30%)
Domain	industrial
Technical conditions and measures to con	ntrol dispersion and exposure
Local exhaust ventilation	yes

Conditions and measures related to pers	sonal protection, hygiene and health evaluation: see details on
Protective gloves	Gloves APF 5 80 %
Respiratory protection	Use respiratory protection when exposure might occur
Local exhaust ventilation	Use local exhaust ventilation with adequate effectiveness
Contributing Scenario (6) control	lling industrial worker exposure for PROC 4
Name of contributing scenario	4 - Use in batch and other process (synthesis) where opportunity for exposure arises
Scenario subtitle	Material transfers. All internal transport. Raw material assembly and charging / raw material dispensing of liquids and solids manually from bulk storage or packed goods into blending tank.
Qualitative Risk Assessment	
General	Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour). Provide extract ventilation to points where emissions occur. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374. Use suitable eye protection. In case of potential exposure wear a suitable respiratory protection with adeguate effectiveness.
Product characteristics	
Physical state	liquid
Concentration in substance	100 %
Fugacity / Dustiness	medium
Frequency and duration of use	
Duration of activity	>4 hours (default)
Frequency of use	5 days / week
Human factors not influenced by risk m	anagement
Exposed skin surface	480 cm^2
Other given operational conditions affect	ting workers exposure
Location	indoors
Ventilation	Good (>30%)
Domain	industrial
Technical conditions and measures to co	ontrol dispersion and exposure
Local exhaust ventilation	yes
Conditions and measures related to pers	conal protection, hygiene and health evaluation: see details on
	
Protective gloves	Gloves APF 5 80 %

Local exhaust ventilation	Use local exhaust ventilation with adequate effectiveness
Contributing Scenario (7) contr	olling industrial worker exposure for PROC 4
Name of contributing scenario	4 - Use in batch and other process (synthesis) where opportunity for exposure arises
Scenario subtitle	Process sampling.
Qualitative Risk Assessment	
General	Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour): Avoid dip sampling. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374. Use suitable eye protection. In case of potential exposure wear a suitable respiratory protection with adeguate effectiveness.
Product characteristics	
Physical state	liquid
Concentration in substance	100 %
Fugacity / Dustiness	medium
Frequency and duration of use	
Duration of activity	15 min1 hour
Frequency of use	5 days / week
Human factors not influenced by risk	management
Exposed skin surface	480 cm^2
Other given operational conditions af	fecting workers exposure
Location	indoors
Ventilation	Good (>30%)
Domain	industrial
Technical conditions and measures to	control dispersion and exposure
Local exhaust ventilation	yes
Conditions and measures related to posec.8 of SDS	ersonal protection, hygiene and health evaluation: see details on
Protective gloves	Gloves APF 5 80 %
Respiratory protection	Use respiratory protection when exposure might occur
Local exhaust ventilation	Use local exhaust ventilation with adequate effectiveness
Contributing Scenario (8) contr	olling industrial worker exposure for PROC 5
Name of contributing scenario	5 - Mixing or blending in batch processes (multistage and/or significant contact)

Scenario subtitle	Drum/batch transfers; Pouring from small containers; Transfer from/pouring from containers; Mixing operations (open systems). Mixing liquid and solid components / into final formulated resin in blending vessel	
Qualitative Risk Assessment		
General	Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour). Keep lids of containers closed during blending. Ensure good work practices are implemented. Provide basic employe training to prevent/minimize exposures. Use suitable chemically resistant gloves, tested to EN374. Use suitable eye protection. Wear suitable coveralls to prevent exposure to the skin. In case of potential exposure wear a suitable respiratory protection with adeguate effectiveness.

Scenario 2: FRP manufacturing in an industrial setting, using UP/VE resins and/or formulated resins (gelcoat, bonding paste, putty etc.) (ES2)

This scenario is described by the following combinations of use descriptors. The corresponding contributing scenarios are described in the respective subchapters.

An overall exposure scenario may be described by a number of contributing scenarios which may be subdivided into environmental exposure, worker exposure and consumer exposure.

The following scenarios contribute to the scenario FRP manufacturing in an industrial setting, using UP/VE resins and/or formulated resins (gelcoat, bonding paste, putty etc.).

This document has been prepared using REACH-Practical-Guide-on-Safe-Use-Information-for-Mixtures-under-REACH-The-LCID-Methodology, considering exposure scenario of relevant raw materials contained in the mixture.

The corresponding release to the environment, exposure of workers resulting from these contributing scenarios is summarized below.

Table 2. Description of ES 2

rable 2. Description of ES 2	
Free short title	FRP manufacturing in an industrial setting, using UP/VE resins and/or formulated resins (gelcoat, bonding paste, putty etc.) (ES2)
Systematic title based on use descriptor	ERC 6D; PROC 3, 5, 7, 8A, 10, 13, 14, 15
Name of contributing environmental scenario and corresponding ERC	ERC 6d Production of resins
Name(s) of contributing worker scenarios and corresponding PROCs	PROC 3 - Use in closed batch process (synthesis or formulation)
	PROC 5 - Mixing or blending in batch processes (multistage and/or significant contact)
	PROC 7 - Industrial spraying
	PROC 8a - Transfer of chemicals from/to vessels/ large containers at non dedicated facilities
	PROC 10 - Roller application or brushing
	PROC 13 - Treatment of articles by dipping and pouring
	PROC 14 - Production of preparations or articles by tabletting, compression, extrusion, pelletisation
	PROC 15 - Use of laboratory reagents in small scale laboratories
Contributing Scenario (1) controlling e	nvironmental exposure for ERC 6D
Operational conditions (referred to styrene)	
Daily amount used at site	161000 kg/day (referred to styrene)
Release times per year	300 days/year (justification: Continous release)
Local freshwater dilution factor	10

Local marine water dilution factor	100
Release fraction to air from process	0.102 %
Release fraction to wastewater from process	0.00063 %
Release fraction to soil from process	0.025 %
Fraction tonnage to region	10 %
Fraction used at main source	60 %
STP	yes
River flow rate	18000 m³/day
Municipal sewage treatment plant discharge	2000000 L/day
Other modified EUSES values	
Fraction released to agricultural soil (Femis.agric)	0 % (justification: No direct release to soil (EU Risk Assessment Report on Styrene,European Communities, 2002))
Fraction released to industrial soil (Femis.ind)	0 % (justification: No direct release to soil (EU Risk Assessment Report on Styrene,European Communities, 2002))
Fraction released to waste water (Femis.water)	0.00063 % (justification: EU Risk Assessment Report, 2002)
Fraction released to air (Femis.air)	0.102 % (justification: EU Risk Assessment Report, 2002)
Fraction used at main source	60 % (justification: Value adopted to account for Worst-case European manufacturing site)
Fraction of emission directed to water by local STP (Fstp.water)	0.081 - (justification: Efficiency STP 91.9%)
Contributing Scenario (2) controlling	industrial worker exposure for PROC 3
Contributing Scenario (2) controlling Name of contributing scenario	industrial worker exposure for PROC 3 3 - Use in closed batch process (synthesis or formulation)
	<u>-</u>
Name of contributing scenario	3 - Use in closed batch process (synthesis or formulation) Material transfers; Automated process with (semi) closed systems; Use in contained batch processes. Resin injection and transfer processes, such as vacuum
Name of contributing scenario Scenario subtitle	3 - Use in closed batch process (synthesis or formulation) Material transfers; Automated process with (semi) closed systems; Use in contained batch processes. Resin injection and transfer processes, such as vacuum
Name of contributing scenario Scenario subtitle Qualitative Risk Assessment	3 - Use in closed batch process (synthesis or formulation) Material transfers; Automated process with (semi) closed systems; Use in contained batch processes. Resin injection and transfer processes, such as vacuüm infusion, RTM, impregnation of sewer relining sleeves Put lids on containers immediately after use. Ensure good work practices are implemented Provide basic employe training to prevent/minimize exposures Use suitable eye protection.

Scenario 3: FRP manufacturing in a professional setting, using UP/VE resins and/or formulated resins (gelcoat, bonding paste, putty etc.) (ES3)

This scenario is described by the following combinations of use descriptors. The corresponding contributing scenarios are described in the respective subchapters.

An overall exposure scenario may be described by a number of contributing scenarios which may be subdivided into environmental exposure, worker exposure and consumer exposure.

The following scenarios contribute to the scenario FRP manufacturing in a professional setting, using UP/VE resins and/or formulated resins (gelcoat, bonding paste, putty etc.).

This document has been prepared using REACH-Practical-Guide-on-Safe-Use-Information-for-Mixtures-under-REACH-The-LCID-Methodology, considering exposure scenario of relevant raw materials contained in the mixture.

The corresponding release to the environment, exposure of workers resulting from these contributing scenarios is summarized below.

Table 2. Description of ES 3

Free short title	FRP manufacturing in a professional setting, using UP/VE resins and/or formulated resins (gelcoat, bonding paste, putty etc.) (ES8)
Systematic title based on use descriptor	ERC 6C; PROC 3, 4, 5, 8A, 10, 11
Name of contributing environmental scenario and corresponding ERC	ERC 6c Production of plastics
Name(s) of contributing worker scenarios and corresponding PROCs	PROC 3 - Use in closed batch process (synthesis or formulation)
	PROC 4 - Use in batch and other process (synthesis) where opportunity for exposure arises
	PROC 5 - Mixing or blending in batch processes (multistage and/or significant contact)
	PROC 8a - Transfer of chemicals from/to vessels/ large containers at non dedicated facilities
	PROC 10 - Roller application or brushing
	PROC 11 - Non industrial spraying

Contributing Scenario (1) controlling environmental exposure for ERC 6C Operational conditions (referred to styrene) Daily amount used at site 48300 kg/day (referred to styrene) Release times per year 300 days/year (justification: Continous release) Local freshwater dilution factor 10 Local marine water dilution factor 100 Release fraction to air from process 0.102 % Release fraction to wastewater from process 0.000012 %

Release fraction to soil from process	0 %
Fraction tonnage to region	10 %
Fraction used at main source	60 %
STP	Yes
River flow rate	18000 m³/day
Municipal sewage treatment plant discharge	2000000 L/day
Other modified EUSES values	
Fraction released to agricultural soil (Femis.agric)	0 % (justification: No direct release to soil (EU Risk Assessment Report on Styrene, European Communities, 2002))
Fraction released to industrial soil (Femis.ind)	0 % (justification: No direct release to soil (EU Risk Assessment Report on Styrene,European Communities, 2002))
Fraction released to waste water (Femis.water)	0.000012 % (justification: EU Risk Assessment Report, 2002)
Fraction released to air (Femis.air)	0.102 % (justification: EU Risk Assessment Report, 2002)
Fraction used at main source	60 % (justification: Value adopted to account for worst-case European manufacturing site)
Fraction of emission directed to water by local STP (Fstp.water)	0.081 - (justification: Efficiency STP 91.9%)
Contributing Scenario (2) controlling p	professional worker exposure for PROC 3
Name of contributing scenario	3 - Use in closed batch process (synthesis or formulation)
Scenario subtitle	Use in contained batch processes. Application of chemical anchoring
Oualitative Risk Assessment

Contributing Scenario (8) controlling professional worker exposure for PROC 10 Name of contributing scenario Scenario subtitle Dipping, immersion and pouring; Rolling, Brushing; Roller, spreader, flow application Application of repair putties; Application of bonding pastes / adhesives.	Protective gloves	Gloves APF 5 80 %
Contributing Scenario (8) controlling professional worker exposure for PROC 10 Name of contributing scenario 10 - Roller application or brushing Dipping, immersion and pouring; Rolling, Brushing; Roller, spreader, flow application Application of repair putties; Application of bonding pastes / adhesives.	Respiratory protection	Use respiratory protection when exposure occurs
Name of contributing scenario 10 - Roller application or brushing Dipping, immersion and pouring; Rolling, Brushing; Roller, spreader, flow application Application of repair putties; Application of bonding pastes / adhesives.	Local exhaust ventilation	Use local exhaust ventilation with adequate effectiveness
Scenario subtitle Dipping, immersion and pouring; Rolling, Brushing; Roller, spreader, flow application Application of repair putties; Application of bonding pastes / adhesives.	Contributing Scenario (8) control	lling professional worker exposure for PROC 10
Rolling, Brushing; Roller, spreader, flow application Application of repair putties; Application of bonding pastes / adhesives.	Name of contributing scenario	10 - Roller application or brushing
Qualitative Risk Assessment	Scenario subtitle	Rolling, Brushing; Roller, spreader, flow application Application of repair putties; Application of bonding pastes
	Qualitative Risk Assessment	

	Wear suitable coveralls to prevent exposure to the skin. Wear a suitable respiratory protection with adeguate
 	Provide basic employe training to prevent/minimize exposures Use suitable eye protection. Use suitable chemically resistant gloves, tested to EN374.
General	Ensure good work practices are implemented
Qualitative Risk Assessment	Application of floorings, mastics, coatings, castings
Scenario subtitle	Dipping, immersion and pouring; Rolling, Brushing; Roller, spreader, flow application Application of floorings, mastics, coatings, castings
Name of contributing scenario	10 - Roller application or brushing
Contributing Scenario (9) contro	olling professional worker exposure for PROC 10
Respiratory protection	yes
Protective gloves	Gloves APF 5 80 %
Conditions and measures related to per sec.8 of SDS	rsonal protection, hygiene and health evaluation: see details on
Local exhaust ventilation	no
Technical conditions and measures to c	ontrol dispersion and exposure
Domain	professional
Ventilation	good (30%)
Location Location	indoors
Other given operational conditions affe	
Exposed skin surface	960 cm ²
Human factors not influenced by risk n	
Duration of activity Frequency of use	>4 hours (default) 5 days / week
Frequency and duration of use	A house (default)
Fugacity / Dustiness	medium
Concentration in substance	100%
Physical state	liquid
Product characteristics	
	exposures Use suitable eye protection. Use suitable chemically resistant gloves, tested to EN374. Wear suitable coveralls to prevent exposure to the skin. Wear a suitable respiratory protection with adeguate effectiveness.
General	Ensure good work practices are implemented Provide basic employe training to prevent/minimize exposures
